## Global Integrated Drought Monitoring and Prediction System (GIDMaPS)

Hao Z., AghaKouchak A., Nakhjiri N., Farahmand A., 2014, Global Integrated Drought Monitoring and Prediction System, *Scientific Data*, 1:140001, 1-10, doi: 10.1038/sdata.2014.1.

<http://www.nature.com/articles/sdata20141>

# Integration of AIRS Data into GIDMaPS

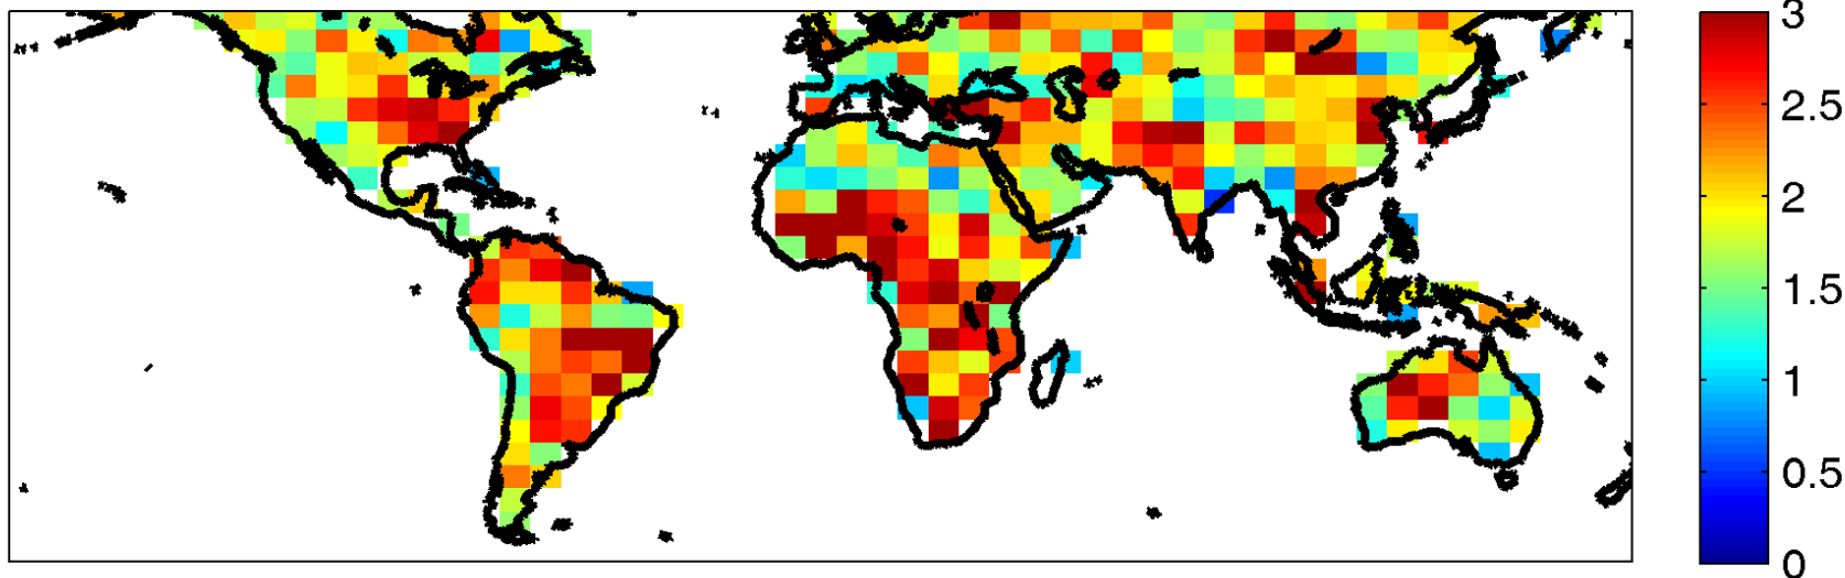

2012 US Drought Latitude 40 Longitude -100

Mean lead time based on SRHI relative to SPI (months).

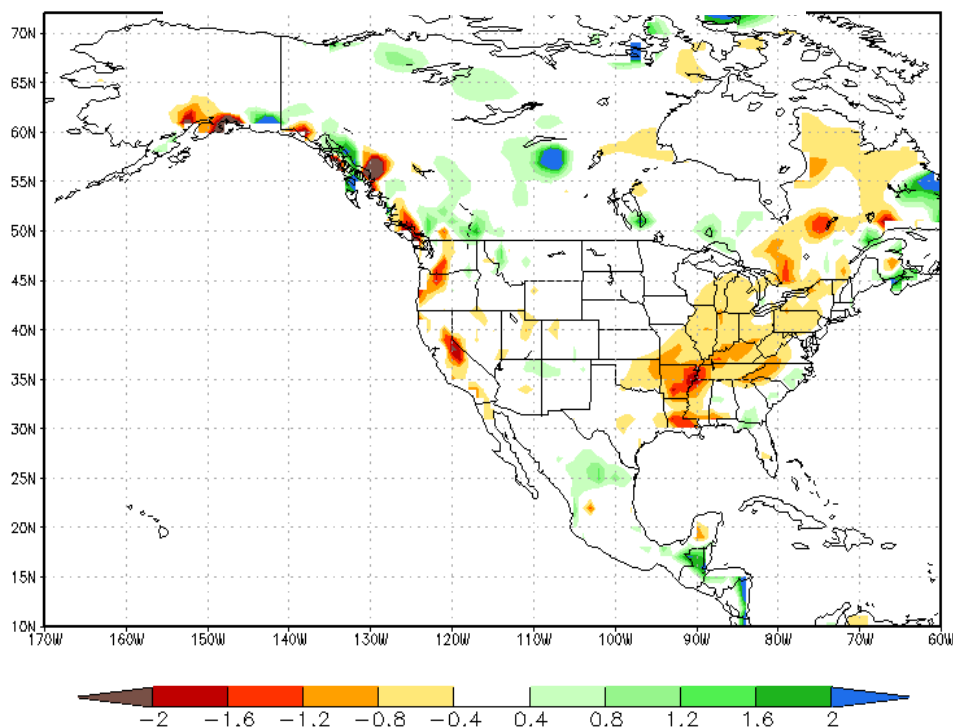

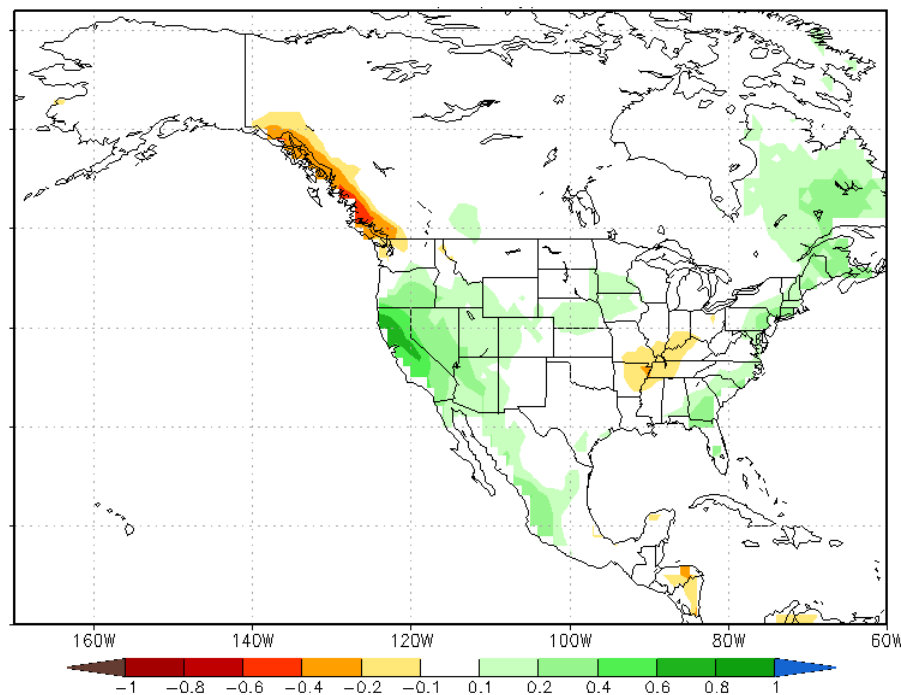

# Motivation

**Observed Precipitation Anomaly  
DJF 2014**

**Predicted Precipitation Anomaly (mm/d)  
DJF 2014 (Initialized: November)**

North American Multi-Model Ensemble (NMME; Kirtman et al., 2014)

**Low Predictability of Precipitation Forecasts in Dynamic Model Simulations**

Analog-year based models also offer low predictability

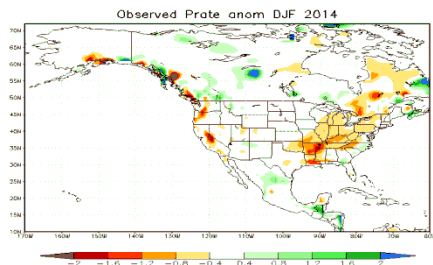

## Analog-Year Model Combined with Dynamic Model Simulations

### Analog-Year Model

### Dynamic Model Simulations

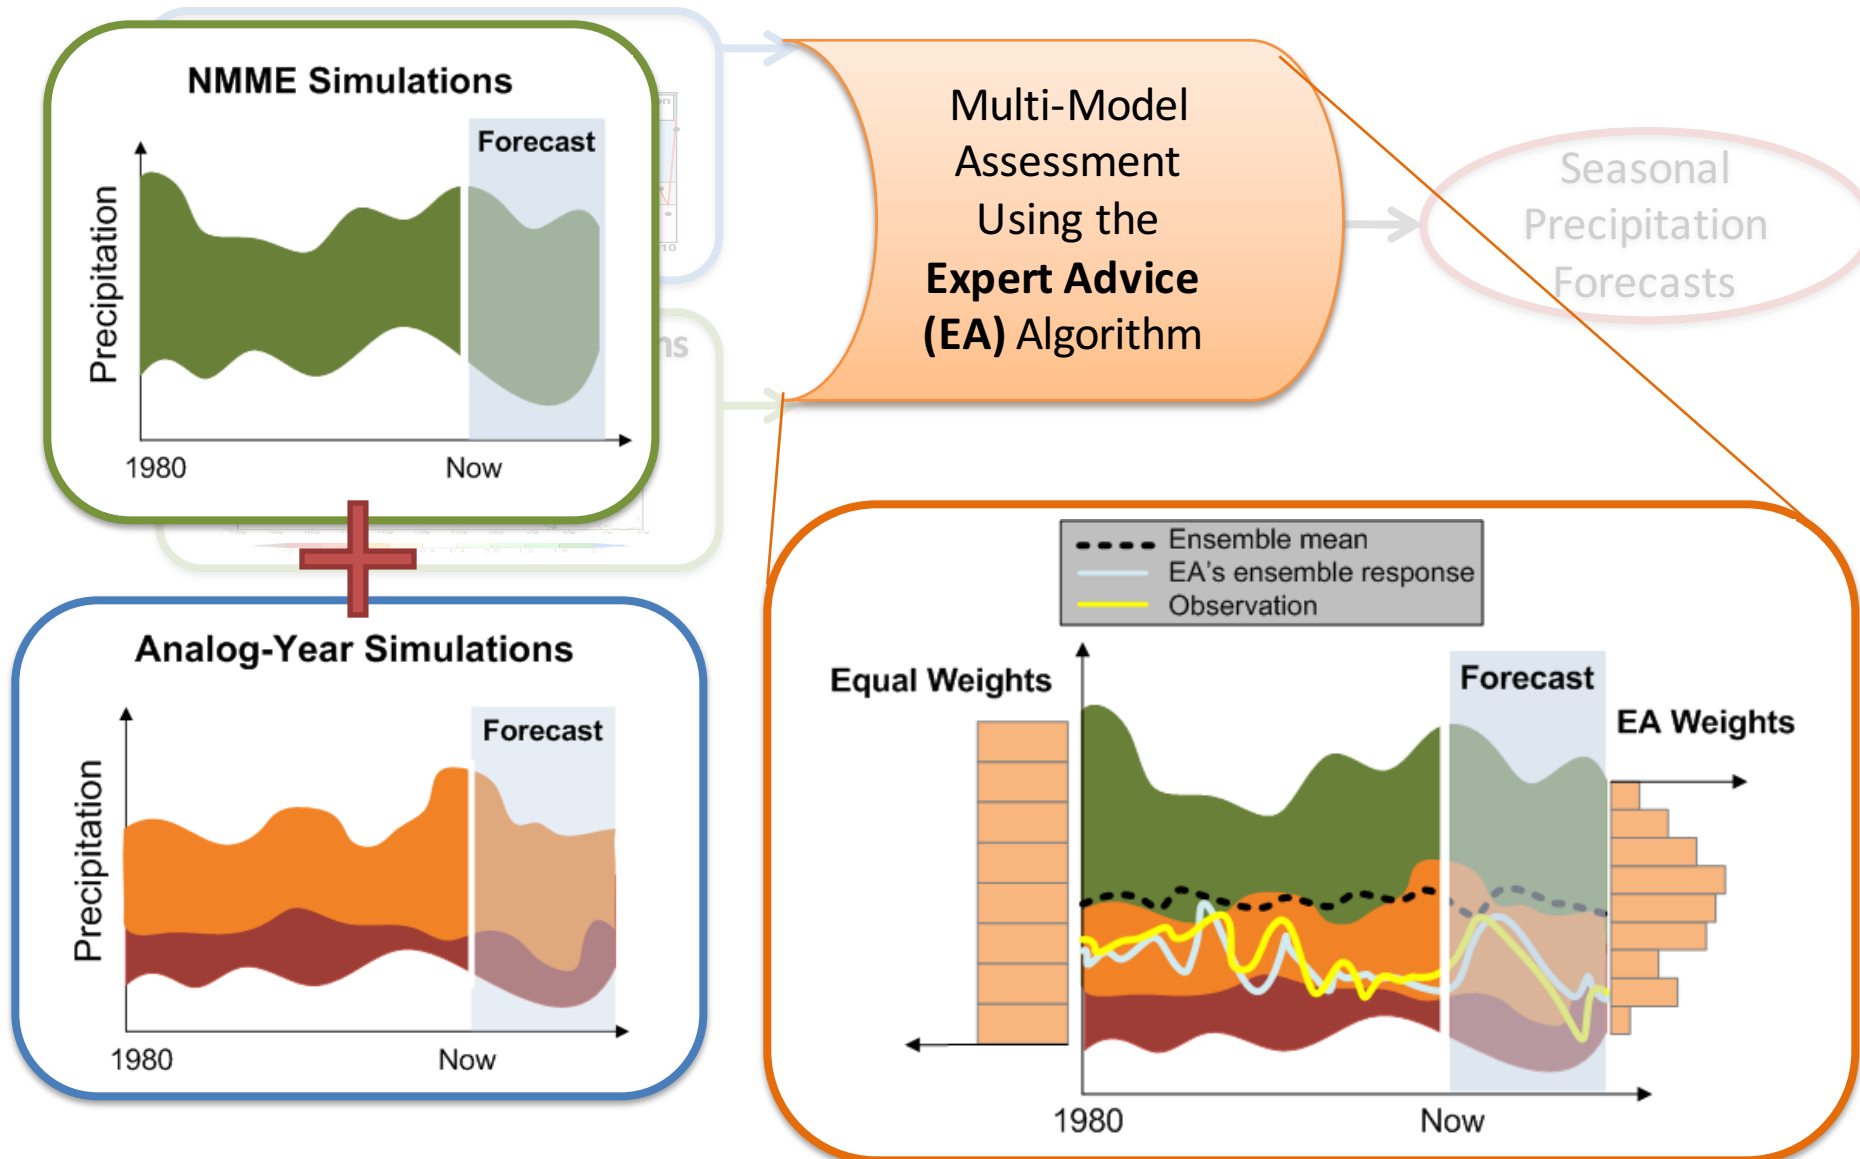

Multi-Model  
Assessment  
Using the  
**Expert Advice  
(EA) Algorithm**

Seasonal  
Precipitation  
Forecasts

## EA Algorithm to Weigh Ens. Members

# Drought Prediction

NDJ, 2014

Observation

NMME (Ensemble mean)

NMME + Analog-Year + EA

## NDJFM, 2014

Observation

NMME (Ensemble mean)

NMME + Analog-Year + EA

# Drought Prediction
